Good soundtrack. Bought it because I want to support the developers.. If I could give this soundtrack a hundred thumbs up, I would.

I've listened to it more times than I could ever count. Many of these songs are the best I've heard in any game, period.

True, there are venues to get this for free, but I would gladly pay \$20 for this soundtrack. Its phenomonal. Check out a few of the songs on youtube if you're unsure. Even if you don't have the game and, for some ungodly reason, don't plan to ever play it, at least give the soundtrack a try.

Truly memorable and infectious, these tracks are pure audible honey that deserve to be paid for.. If I were to get married, I'd play this soundtrack on the party.

That is how much I love it.. this \*is\* an amazing soundtrack and i would like to tell you to buy it, but you shouldn't buy it.

it's a mess of mp3s from various sources at different bitrates (from 128 kps to 320) with differing ID3 information (showing tracks coming from the soundtrack itself, related eps or no tags, at all)

for the asking price, i'd expect this to be entirely uniform as far as sources, bitrate and tags go. but the whole thing is an utter mess, and was seriously dissapointing, to me :V. I guarantee that after buying that soundtrack for 9.99 and listening to it you'll feel like a robber.

Worth every single cent.

When I die, I don't want anything playing in my funeral but this soundtrack.. THIS IS.... AWESOME !!

How to listen - Horse Steppin

- 1) buy soundtrack
- 2) download it
- 3) find Horse Steppin and turn on
- 4) open bottle of booze
- 5) drink
- 6) chillout. Best indie game soundtrack ever.. I've never really been enthusiastic about videogame soundtracks. I usually find them boring, stock and simply uninteresting. The soundtrack Hotline Miami has to offer however really made me turn my head. It's very vivid, upbeat and fitting well in game. It ranges from really relaxed to tracks that really emphasize the feeling of "this is the finale, let's do this". All and all a great soundtrack of quite a length as well.

There are 22 tracks for the price of 10 euro which equals to about 0.45 euro per track. Some tracks are more lengthy than others which compensates even more.

Make sure you check out the soundtrack of the sequel as well!

[>>> My review of that here <<<. Very easy to like and even easier to love.](#)

[It offers all the songs from the game hotline miami \(obviously\) and this is what makes it good. If you don't know or haven't played the hotline miami game \(if you haven't played play it\) the songs on the soundtrack aren't exactly the same in every way, as yes it does have a more electric sound, but the tracks, as they've been used to tell a story of sorts throughout the game and are done by different artists rather than the one person or band are mostly unique in their own ways. For example you may like all the tracks by... say moon but dislike the scattle one \(personal favourites of mine\), but this is what makes it good because your bound to find atleast some songs that you'll love in the mix of songs. If your fans of hotline miami as i know i am your bound to not regret this buy and if your new as i explained im sure you'll find something that takes your fancy.](#)  
[.The game is fun, but HOLY \u2665\u2665\u2665\u2665 the soundtrack is amazing!. This is my favourite game soundtrack. Always love to help out an Indie Dev with great games. This is no exception. I expect a similar experience with gameplay and sound with the 2nd installment.. Hotline Miami Soundtrack](#)
